FIBROTECH BARCODE

With Barcode you get the traditional woodwool cement board in a new and modern design. Barcode is our multifine woodwool cement board with 1.0 mm woodwool and space for oak sticks. You can choose to fill up the board with sticks or create a pattern in the ceiling. Oak sticks are easily glued in with FibroTech mounting glue. Barcode has exactly the same good properties like the traditional woodwool cement board, and you can decorate your ceiling with different wooden sticks yourself, so it will give you a unique look.
